## 149 ED VISITS FOR OVERDOSE INVOLVING MEDICATIONS OR DRUGS WITH DEPENDENCY POTENTIAL

### Med/Drug^ Overdose ED Visits by Med/Drug Class Last 12 Months: Lee County

Trend lines shown for Med/Drug classes having a monthly average **≥3 visits**. It is important to note, if a Med/Drug class is not shown, it does not mean there were no visits, but that the monthly average is less than 3.

^Report is based on initial encounter, **unintentional** and **undetermined** intent cases only, for ICD10CM overdose codes of drugs and medicaments with dependency potential within **T40, T42, T43, T50.7, and T50.9**.

**Note:** Report is restricted to N.C. residents between the ages 15 to 65 years. Drug classes shown are not mutually exclusive, a person may have more than one drug overdose diagnosis code, therefore, a person may be represented in multiple lines in the graph above. \*2019-2020 data is provisional; YTD (Year to date).

**Note:** NC DETECT is North Carolina's statewide syndromic surveillance system. There may be data quality issues affecting our counts. For training on NC DETECT, contact Amy Ising, [ising@ad.unc.edu](mailto:ising@ad.unc.edu).

### 149 Overdose ED Visits for Med/Drugs^ with Dependency Potential in Lee County, 2020\*YTD

compared to **83** Jan to Aug 2019

**Data Source:** NC DETECT: ED; Syndrome: Overdose: Unintentional/Undetermined Medication or Drug Overdose (>14/<66) (ICD-9/10-CM)
