Moore County

ED VISITS FOR OVERDOSE INVOLVING MEDICATIONS OR DRUGS WITH DEPENDENCY POTENTIAL

Med/Drug\(^*\) Overdose ED Visits by Med/Drug Class

Last 12 Months: Moore County

Trend lines shown for Med/Drug classes having a monthly average \(\geq 3\) visits. It is important to note, if a Med/Drug class is not shown, it does not mean there were no visits, but that the monthly average is less than 3.

\(^*\)Report is based on initial encounter, **unintentional** and **undetermined** intent cases only, for ICD10CM overdose codes of drugs and medicaments with dependency potential within T40, T42, T43, T50.7, and T50.9.

Note: Report is restricted to N.C. residents between the ages 15 to 65 years. Drug classes shown are **not mutually exclusive**, a person may have more than one drug overdose diagnosis code, therefore, a person may be represented in multiple lines in the graph above. *2019-2020 data is provisional; YTD (Year to date).

Note: NC DETECT is North Carolina’s statewide syndromic surveillance system. There may be data quality issues affecting our counts. For training on NC DETECT, contact Amy Ising, ising@ad.unc.edu.
