Other: 4.2% vs 3.8%

263 Year-to-Date Opioid Diagnosis ED Visits in Cumberland versus January to December 2016 228

Source: NC DETECT; ED; Syndrome: Overdose: Opioid Overdose (ICD-9/10-CM)

Note: Counts based on diagnosis (ICD-9/10-CM code) of an opioid overdose of any intent (accidental, intentional, assault, and undetermined) for North Carolina residents. Opioid overdose cases include poisonings with opium, heroin, opioids, methadone, and other synthetic narcotics.

NOTE: The North Carolina Disease Event Tracking and Epidemiologic Collection Tool (NC DETECT) is North Carolina’s statewide syndromic surveillance system. For training on NCDETECT, contact Amy Ising, ising@ad.unc.edu.

Emergency department visit data from NC DETECT are provisional and should not be considered final. There may be data quality issues affecting our counts; counties with <10 cases may not be true lack of opioid overdose cases but data quality issues; additionally, some hospitals use non-specific poisoning codes rather than specific opioid poisoning codes.
