- Alamance population estimate
- Alamance opioid overdose ED visits last 12 months

Opioid Overdose ED Visits in
Alamance County, January 2020*

compared to 5 January 2019*

Source: NC DETECT; Data Source: ED; Custom Event: Overdose: Opioid Overdose V.2 (ICD-9/10-CM)

Counts based on ICD-10-CM diagnosis code of an opioid overdose: T40.0 (Opium), T40.1 (Heroin), T40.2 (Other Opioids), T40.3 (Methadone), and T40.4 (Other Synthetic Narcotics), and T40.6 (Other and Unspecified Narcotics).

Note: NC DETECT is North Carolina’s statewide syndromic surveillance system. There may be data quality issues affecting our counts: counties with <10 cases may not be true lack of opioid overdose cases but data quality issues; additionally, some hospitals use non-specific poisoning codes rather than specific opioid poisoning codes. For training on NCDETECT, contact Amy Ising, ising@ad.unc.edu.

*Provisional Data: 2019-2020 ED Visits

Non-hispanic, except when ethnicity data are missing or incomplete (less than 85% ethnicity data available); if ethnicity is missing, race categories include both Hispanic and Non-Hispanic.

AI/AN (American Indian/Alaskan Native).
