422 All opioid overdose ED visits: October 2018
Compared to 517 October 2017

The highest concentration of visits by zip code occurred in:

Stanly, Robeson, Onslow, and Edgecombe counties.

The highest rates occurred in:

Stanly (32.9 per 100,000 residents), and Edgecombe (22.5 per 100,000 residents) counties.

Note: Counts based on diagnosis (ICD-9/10-CM code) of an opioid overdose of any intent (accidental, intentional, assault, and undetermined) for North Carolina residents. Opioid overdose cases include poisonings with opium, heroin, opioids, methadone, and other synthetic narcotics.

*Emergency department visit data from NC DETECT are provisional and should not be considered final. There may be data quality issues affecting our counts: counties with <10 cases may not be true lack of opioid overdose cases but data quality issues; additionally, some hospitals use non-specific poisoning codes rather than specific opioid poisoning codes.
The highest concentration of visits by zip code occurred in:

Stanly, Robeson, and Edgecombe counties.

The highest rates occurred in:

Stanly (23 per 100,000 residents), and
Edgecombe (16.9 per 100,000 residents) counties.

Note: Counts based on diagnosis (ICD-9/10-CM code) of a heroin overdose of any intent (accidental, intentional, assault, and undetermined) for North Carolina residents. *Emergency department visit data from NC DETECT are provisional and should not be considered final.
