

451

NORTH CAROLINA EMERGENCY DEPARTMENT (ED) VISITS FOR OPIOID OVERDOSE: MAY 2018

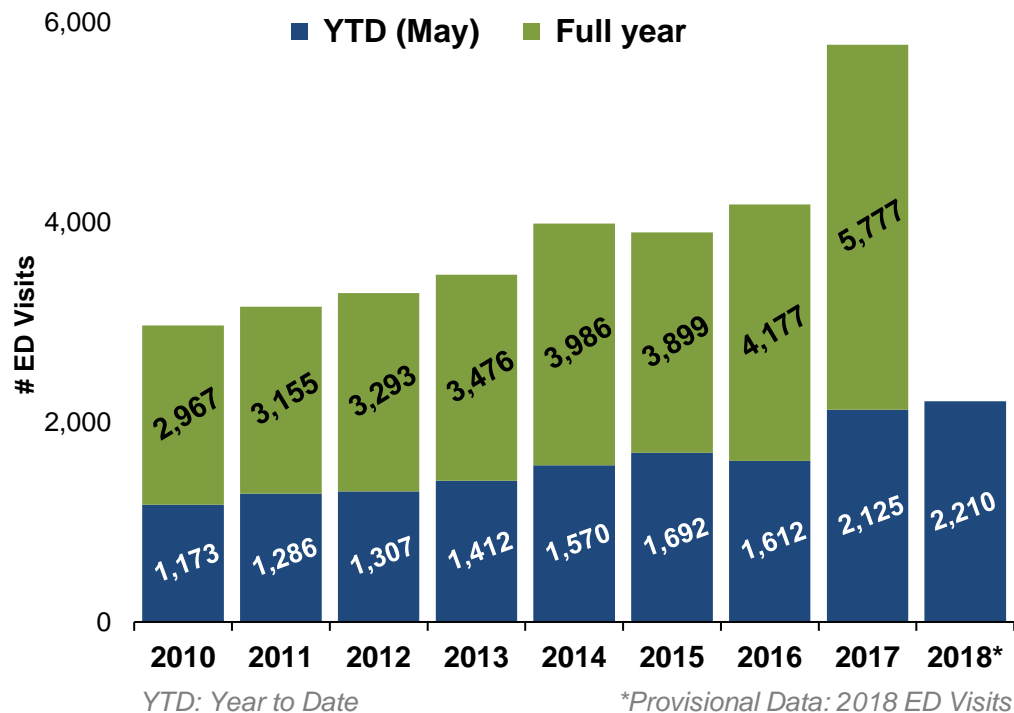

451 Opioid overdose ED visits
May 2018

Compared to **484** May 2017

Source: NC DETECT: ED; Syndrome: Overdose: Opioid Overdose (ICD-9/10-CM)

Note: Counts based on diagnosis (ICD-9/10-CM code) of an opioid overdose of any intent (accidental, intentional, assault, and undetermined) for North Carolina residents. Opioid overdose cases include poisonings with opium, heroin, opioids, methadone, and other synthetic narcotics.

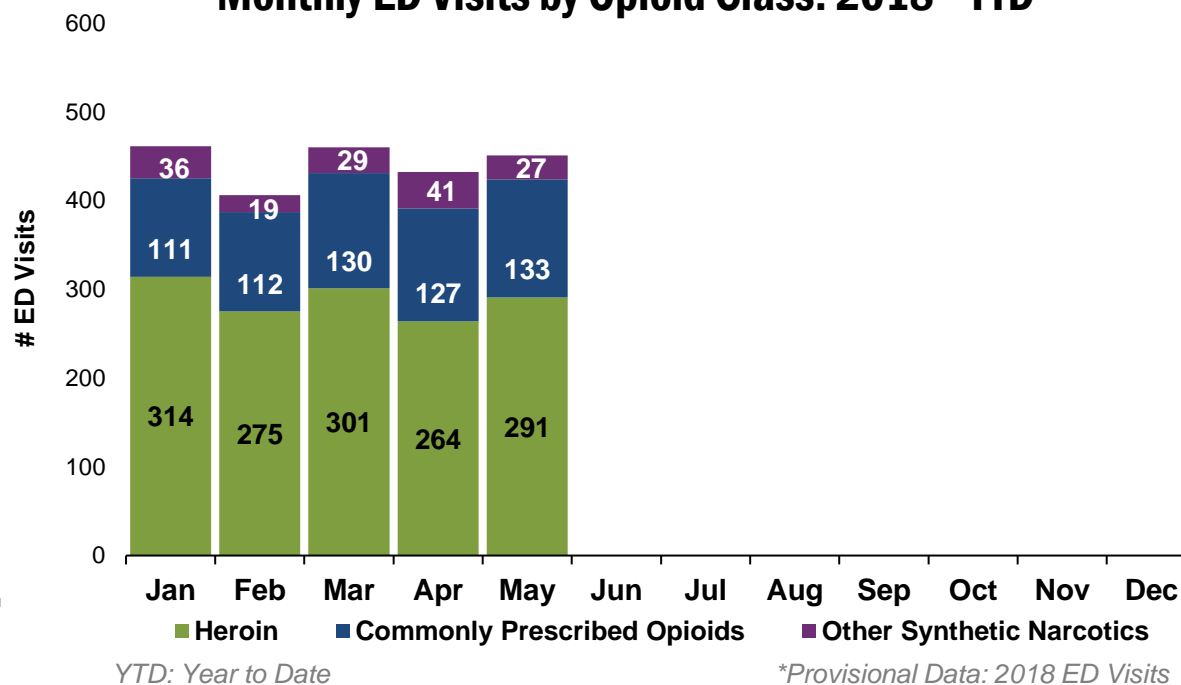

Opioid Overdose ED Visits by Year: 2010-2018*

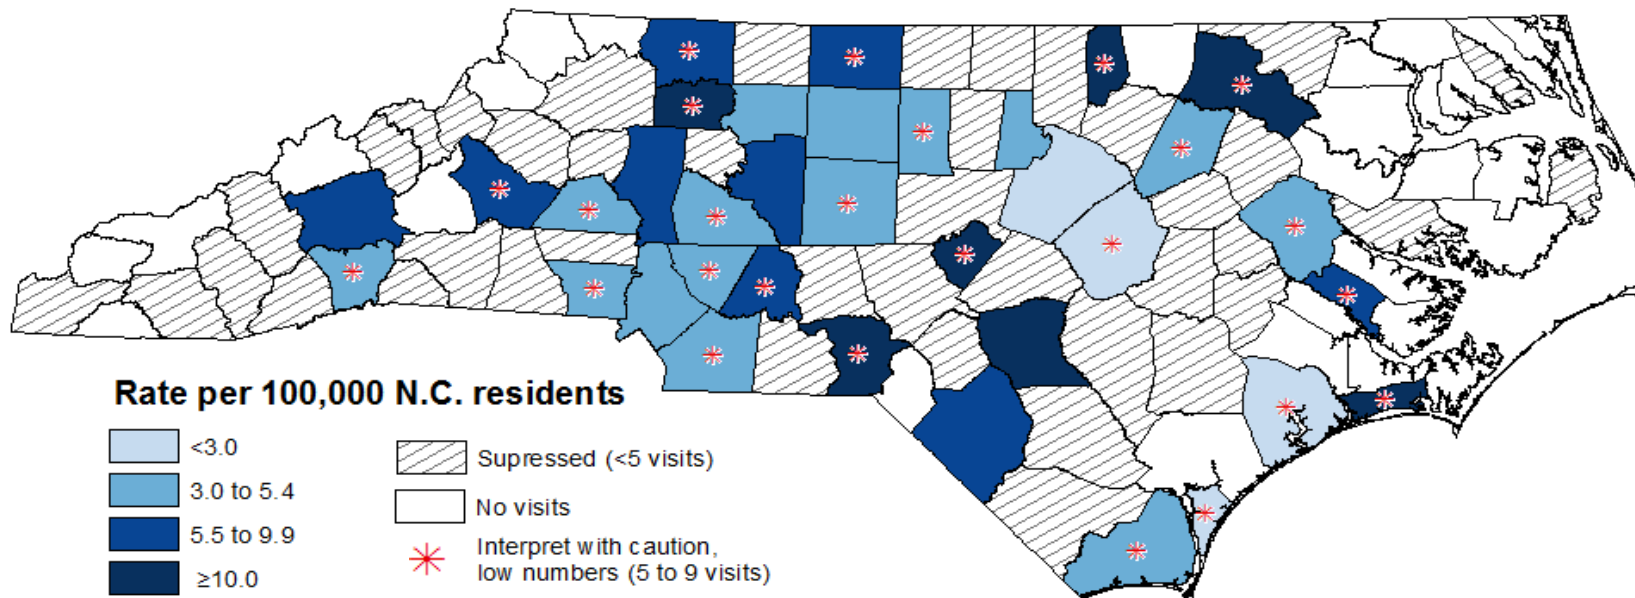

Opioid Overdose ED Visits by Month: 2017-2018*

Monthly ED Visits by Opioid Class: 2018* YTD

Rate of Opioid Overdose ED Visits by County: May 2018*

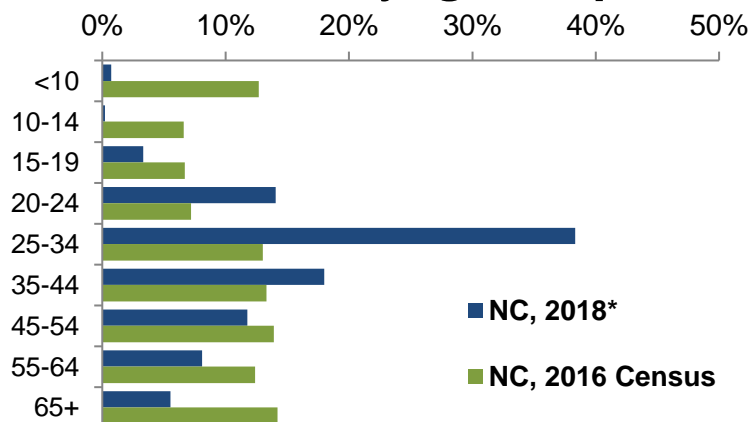

Highest Rates of Opioid Overdose ED visits among Counties ≥ 10 visits

County	Count	Rate
Cumberland*	40	12.2
Robeson	12	9.0
Davidson	10	6.1
Buncombe	15	5.9
Iredell*	10	5.8
Forsyth	20	5.4
Mecklenburg*	48	4.6
Durham	12	3.9
Guilford	20	3.8
Wake	18	1.7

Note: Rate per 100,000 N.C. residents;
 • This county saw an increase of 5 or more overdoses this month compared to last month.

Demographics of 2018 Opioid Overdose ED Visits Compared to the 2016 NC Standard Population Census

ED Visits by Age Group

ED Visits by Race

Demographic data from the North Carolina census provide population-level context for potential disparities by age or race among opioid overdose ED visits.

In North Carolina, ED visits for opioid overdose occur predominately among whites, and those ages 25-34 years.

NOTE: The North Carolina Disease Event Tracking and Epidemiologic Collection Tool (NC DETECT) is North Carolina's statewide syndromic surveillance system. For training on NCDETECT, contact Amy Ising, ising@ad.unc.edu.

*Emergency department visit data from NC DETECT are provisional and should not be considered final. There may be data quality issues affecting our counts: counties with <10 cases may not be true lack of opioid overdose cases but data quality issues; additionally, some hospitals use non-specific poisoning codes rather than specific opioid poisoning codes. NC DETECT reports five categories of race: White, Black, American Indian, Asian, or Other. Due to low counts, Asian, American Indian, and Other races have been collapsed into a single category.
