

# 422

# NORTH CAROLINA EMERGENCY DEPARTMENT (ED) VISITS FOR OPIOID OVERDOSE: OCTOBER 2018

## 422 Opioid overdose ED visits October 2018

Compared to **517** October 2017

Source: NC DETECT: ED; Syndrome: Overdose: Opioid Overdose (ICD-9/10-CM)

**Note:** Counts based on ICD-10-CM diagnosis code of an opioid overdose: **T40.0** (Opium), **T40.1** (Heroin), **T40.2** (Other Opioids), **T40.3** (Methadone), and **T40.4** (Other Synthetic Narcotics). We have changed our opioid poisoning definition for county tables posted on our injuryfreenc poisoning data page to include **T40.6** (other and unspecified narcotics), therefore numbers seen on these monthly reports will not match the posted county tables.

### Opioid Overdose ED Visits by Year: 2010-2018\*

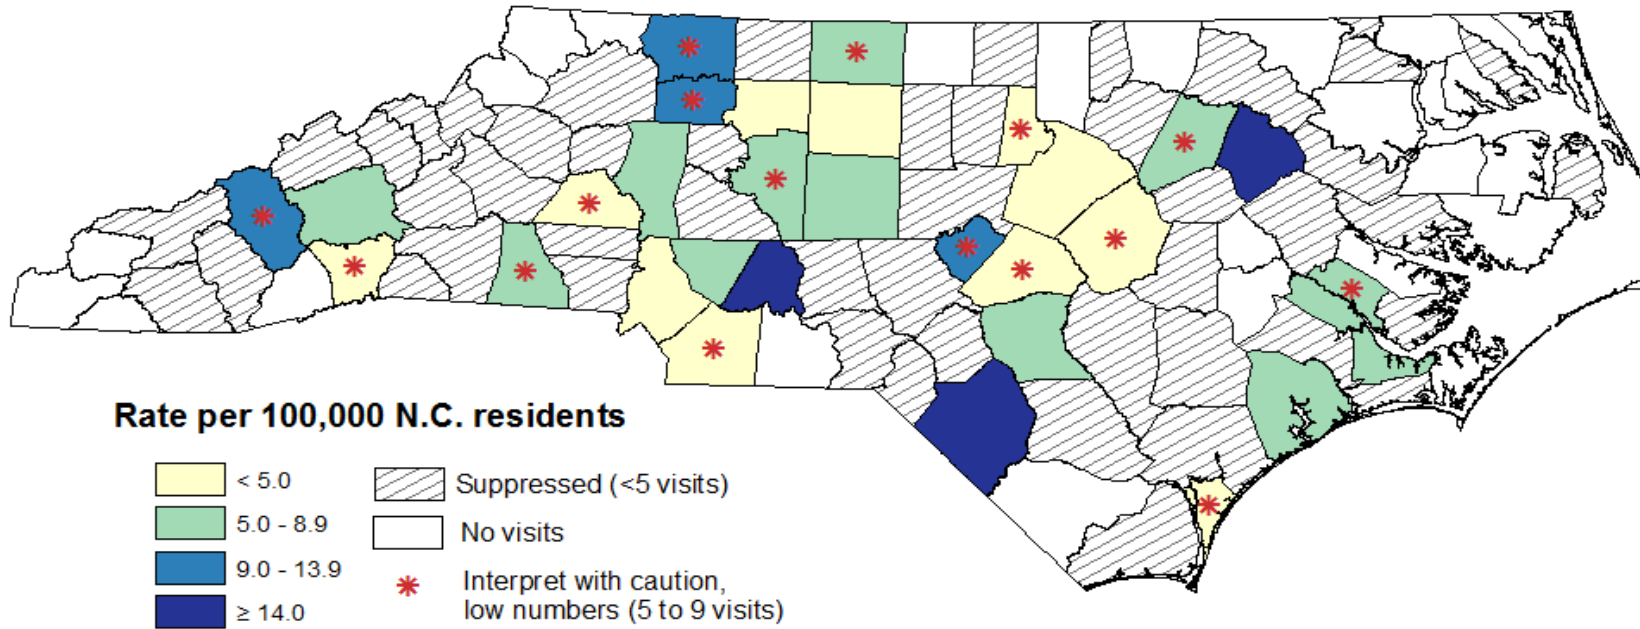

### Opioid Overdose ED Visits by Month: 2017-2018\*

### Monthly ED Visits by Opioid Class: 2018\* YTD

# Rate of Opioid Overdose ED Visits by County: October 2018\*

## Highest Rates of Opioid Overdose ED visits among Counties ≥10 visits

County	Count	Rate
Stanly •	20	32.5
Edgecombe	12	22.8
Robeson •	21	15.8
Randolph	12	8.4
Cabarrus	16	7.7
Onslow	13	6.7
Buncombe	17	6.6
Cumberland	21	6.3
Iredell	10	5.7
Forsyth	12	3.2

**Note:** Rate per 100,000 N.C. residents;  
 • This county saw an increase of 6 or more overdoses this month compared to last month.

## Demographics of 2018 Opioid Overdose ED Visits Compared to the 2017 NC Standard Population Census

### ED Visits by Age Group

### ED Visits by Race

Demographic data from the North Carolina census provide population-level context for potential disparities by age or race among opioid overdose ED visits.

In North Carolina, ED visits for opioid overdose occur predominately among whites, and those ages 20-44 years.

**NOTE:** The North Carolina Disease Event Tracking and Epidemiologic Collection Tool (NC DETECT) is North Carolina's statewide syndromic surveillance system. For training on NCDETECT, contact Amy Ising, [ising@ad.unc.edu](mailto:ising@ad.unc.edu).

\*Emergency department visit data from NC DETECT are provisional and should not be considered final. There may be data quality issues affecting our counts: counties with <10 cases may not be true lack of opioid overdose cases but data quality issues; additionally, some hospitals use non-specific poisoning codes rather than specific opioid poisoning codes. NC DETECT reports five categories of race: White, Black, American Indian, Asian, or Other. Due to low counts, Asian, American Indian, and Other races have been collapsed into a single category.
