[†]In October 2015, there was a change in the coding system used in administrative data sets that impacted the definition used to identify poisoning-related injury cases. Because of this change, data are unavailable for 2015, and **data pre-2015 are not comparable to data collected after this change occurred**. Case definitions in the new coding system are still under review and are therefore subject to change. For more information on the coding transition visit:

<http://www.injuryfreenc.ncdhhs.gov/DataSurveillance/ICD-10-Transition-1pg-Summary.pdf>

ICD-10-CM codes (2016 to 2017): Dx T36-T65.94XS; a 5th/6th character of 1-unintentional, 2-intentional self-harm, 3-assault, or 4-undetermined intent; a 7th character of A-initial encounter, D-subsequent encounter, or missing.

ICD-9-CM codes (2008 to 2014): Dx 960-989 or ecode E850.0-E869.9 (Accidental), E950.0-E952.9 (Self-Inflicted), E962.0-.9 (Assault), E972 (Legal Intervention by Gas), E979.6-.7 & E979.9 (Terrorism), E980.0-E982.9 (Undetermined).

Notes: In 2016, a new data file structure was provided which included additional diagnosis code fields. It is unclear how this impacts trend data. Please interpret trends with caution. Previous versions of this data restricted ICD-9-CM years to dx1-dx6; this table update includes three additional diagnosis fields (dx1-dx11), which may cause an increase in case counts from 2008-2014.
