see notes.

[†]In October 2015, there was a change in the coding system used in administrative data sets that impacted the definition used to identify poisoning-related injury cases. Because of this change, data are unavailable for 2015, and **data pre-2015 are not comparable to data collected after this change occurred**. Case definitions in the new coding system are still under review and are therefore subject to change. For more information on the coding transition visit:

<http://www.injuryfreenc.ncdhhs.gov/DataSurveillance/ICD-10-Transition-1pg-Summary.pdf>

ICD-10-CM codes (2016 to 2017): Dx T43.6; a 5th/6th character of 2-intentional self-harm; a 7th character of A-initial encounter, D-subsequent encounter, or missing.

ICD-9-CM codes (2008 to 2014): No equivalent ICD-9-CM codes.

Notes: In 2014, a new data file structure was provided by the SCHS and NCHA, which included additional diagnosis code fields. It is unclear how this impacts trend data. Please interpret trends with caution.
